

# Himmelstrutz GOAT AC30s Guitar Amplifier

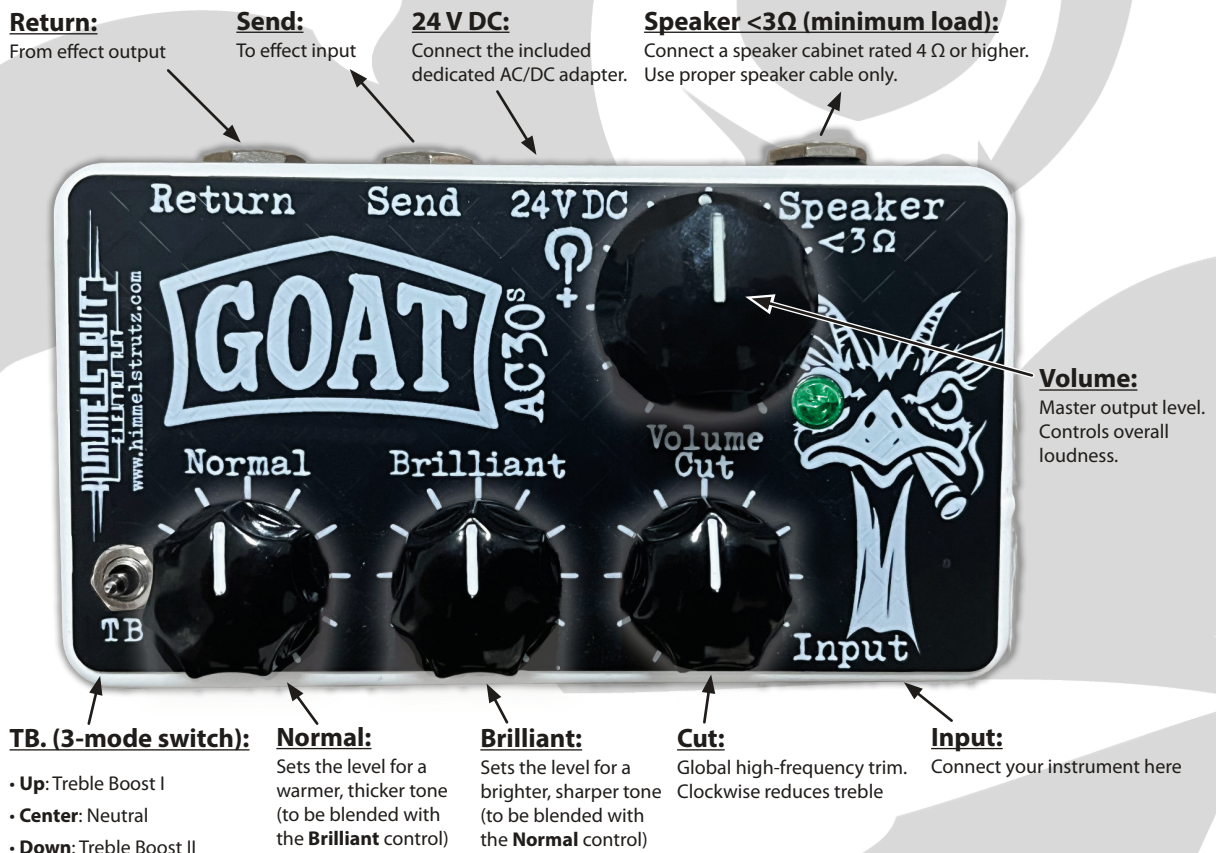

## Owner's Manual (Serial. #001-)

Congratulations on your choice of the **GOAT AC30s** Amplifier—a true analogue alternative to large valve amps that sound great but demand weight, heat, maintenance, and excessive power. Inspired by the earliest British AC-style amplifiers, the GOAT AC30s is compact, powerful, and fast to respond, delivering classic amplifier character in a modern format.

### Quick Start

1. Before connecting anything, set **Vol** fully counter-clockwise (0).
2. Connect a speaker cabinet rated at 4 Ω or higher to the **Speaker <3Ω** jack using a proper speaker cable.
3. Connect your instrument (guitar or bass) to the **Input** jack.
4. Connect your desired effects (time-based effects for example) to the buffered serial effects loop jacks.
5. Connect the included 24 V DC power supply to the **24 V DC** jack.
6. Slowly adjust **Normal** and **Brilliant & Volume** to the desired levels. Fine-tune the sound using the **Cut & TB** controls.

### Jacks & Controls

### Typical Use Cases

#### • Practice / Studio

Compact, high-headroom amp with real power-amp feel at reasonable volume. The **GOAT AC30s** is also a great pedal platform—particularly with the **Himmelstrutz pedals!**

#### • Live

Use with a proper guitar cabinet. **GOAT AC30s** delivers fast attack, real punch, and valve-like dynamics without tubes, heat, or warm-up time.

#### • With RECO

**GOAT AC30s** pairs perfectly with Himmelstrutz **RECO** for silent recording, direct-to-PA, or hybrid speaker + recording setups.

### End Note

The **GOAT AC30s** Amplifier is designed and handmade in Sweden by Himmelstrutz Elektro Art. Built to deliver real amplifier dynamics, response, and authority—without valves, maintenance, or compromise. Small enough to go anywhere—ready for your next gig.

Rock n' roll!
